### For Immediate Release

February 7, 2022, 2:10 p.m. (ChST)

### NWS Advisories in Effect; Hazardous Surf and Seas Expected by this Evening

The National Weather Service (NWS) Guam Weather Forecast Office has the following advisories in effect:

A **high surf advisory** will be in effect for Guam, Rota, Tinian, and Saipan from 6 p.m. this evening to 6 a.m. Tuesday. Large breaking waves of 7 to 9 feet are expected along north facing reefs.

A **high risk of rip currents** will be in effect for Guam, Rota, Tinian, and Saipan from 6 p.m. this evening to 6 a.m. Tuesday. Dangerous rip currents are expected along north and east facing reefs. Rip currents can sweep even the best swimmers away from the shore into deeper water. Inexperienced swimmers should remain out of the water due to dangerous surf conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

A **small craft advisory** remains in effect for the coastal waters of Guam, Rota, Tinian, and Saipan until 6 p.m. Wednesday. Northeast winds of 20 to 25 knots, with gusts up to 30 knots, and seas of 8 to 10 feet are expected. Inexperienced mariners, especially those operating smaller vessels, should avoid navigating in hazardous conditions.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD) remind the community to avoid hazardous sea and surf, especially north and east facing reefs and beaches. Heed the advice of lifeguards, beach patrol flags, and signs.
